

Hot get the most out of these Documents

This is a brief guide to help you get the most out of the Portable Document Format (.pdf) used to put the Land Use Regulations for the Town of Somers on the World Wide Web.

These documents are compatible with both the Apple and IBM P.C.'s. This makes them easily accessible to anyone who has access to the World Wide Web.

Below, and on the left side of the Acrobat reader screen you are looking at, you will see an index directory for each of the Articles in the regulation documents.

- Note the small arrow pointing to the Article title.

—————▶  ARTICLE IX ~ General Provisions

- By pointing to the arrow with the mouse and clicking it you can Open up the Index directory to reveal the links to the individual sub-indexes.

—————▶  ARTICLE IX ~ General Provisions
 ~ 213-56. Appeals.
 ~ 213-57. Amendments.
 ~ 213-58. Severability.
 ~ 213-59. Repealer.
 ~ 213-60. Effective date.
 ~ 213-61. Drawings and sketches.

- Each of these Bookmarks will take you directly to the chosen Article or sub index. This feature makes the document completely accessible allowing you to read entire sections or only those sections that pertain to your interest.
- The SampleDirectory to the left on this screen will function the same way but as an example will only show how this feature works. On the actual pages it will allow navigation in any order you choose.

We hope that through the use of these pages you will have easy access to these regulations.
